about us

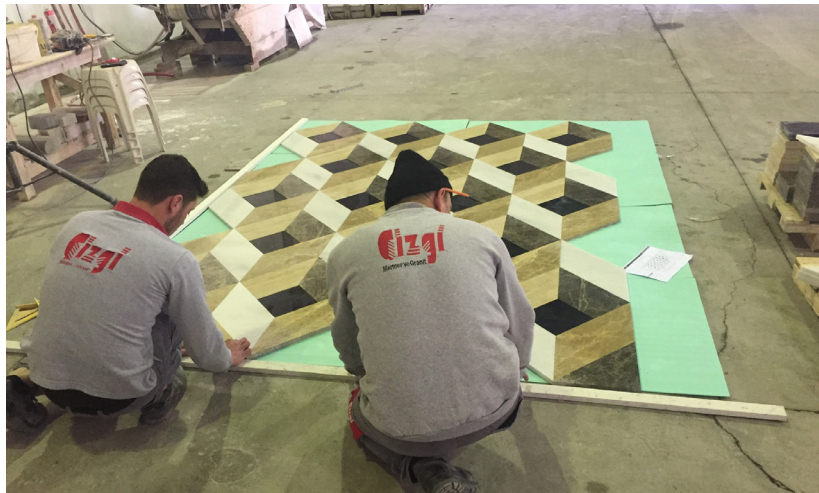

4

Çizgi Marble and Granite was founded in 1993 in Balıkesir, Turkey. The principle of the company is always maintaining the quality of products, timely delivery, and customer satisfaction. Çizgi Marble and Granite producing for domestic and export market in continuous growth strategy.

Our company, which currently makes production in the two separate halls that are built in the total areas of 5000 m², 1500 m² of which is closed and 3500 m² of which is open, has a plant operating with high production capacity. The 20 % of our products, which are produced with fully automatic machines having CNC and PLS controls in our modern machine park, consists of our products which are exported to different countries around the World. The primary goal of our company is to put our products, which are produced by using high technology, upon the larger market and to increase our market share as well as pegging domestic and foreign sales ratio. Besides, our company, which attaches great importance to research and development activities by joining national and international stone fairs continuously, carries out its activities to work with natural stone types using the latest technology and to become a leading company in its sector.

By tooling natural stones obtained from Turkey and several countries around the World, our company appeals to every taste and every segment from a villa to a large shopping center and completely works as a project company with its quality products and produces special products for projects.
